

Document 1: Solution Name and Repository Details

Submission Document

Solution Name: **Quantum Shield: Enterprise Post-Quantum Security Platform**

Repository: https://github.com/Mohitlikestocode/Quantum-Proof-Systems-Scanner_PNB

Generated: 2026-07-18 10:19

Official Solution Name

Quantum Shield: Enterprise Post-Quantum Security Platform

Updated Repository Link

https://github.com/Mohitlikestocode/Quantum-Proof-Systems-Scanner_PNB

Project Identification

Field	Value
Package Name	quantum-shield-pnb
Team	CyberRiot
Primary Domain	Post-Quantum Security Scanning and Reporting
Frontend	React + Vite + TypeScript + Tailwind CSS
Backend	FastAPI + Python Engine Modules

Executive Description

Quantum Shield is an enterprise-grade post-quantum security platform designed to scan domains and subdomains, detect cryptographic weaknesses, classify risk posture, produce governance-ready reports, and support OS-level defensive analysis. The platform unifies scanner telemetry, risk scoring, reporting, scheduling, and AI-assisted operations in one integrated interface.

Prepared for formal submission and technical evaluation.
