

# Vulnerability & Hosting Report

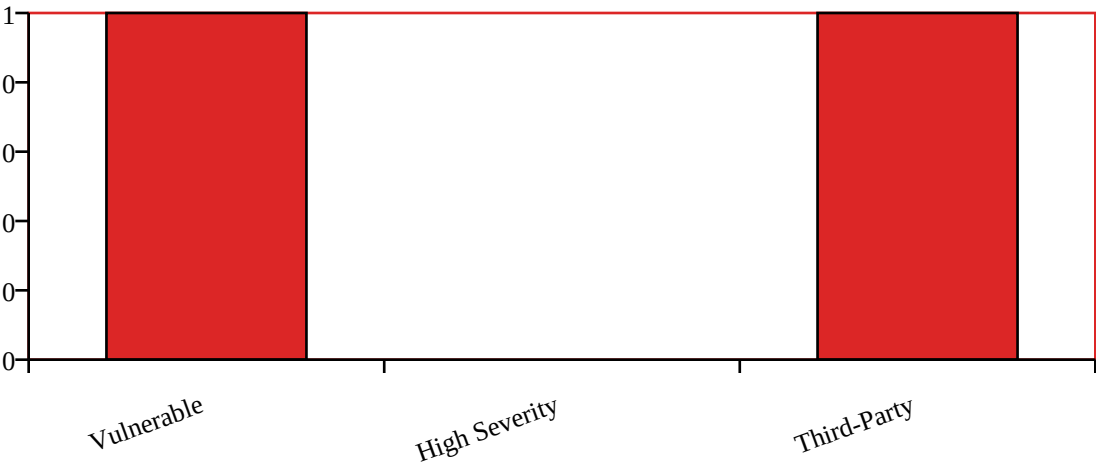

Generated on 2026-07-31 15:28:10

## Executive Summary

Vulnerable domains: 1. High severity domains: 0. Third-party hosted: 1.

|                    |   |
|--------------------|---|
| Vulnerable Domains | 1 |
| High Severity      | 0 |
| Third-Party Hosted | 1 |

## Hosting / Severity Overview

## Vulnerable Assets

| Asset Name  | Algorithm                                                                                                  | TLS Version | Status |
|-------------|------------------------------------------------------------------------------------------------------------|-------------|--------|
| example.com | Security Misconfiguration, Security Misconfiguration, Security Misconfiguration, Security Misconfiguration | 3rd Party   | High   |

## Actionable Recommendations

- Remediate SQL Injection and XSS findings with immediate patch cycles.
- Review contracts and controls for third-party hosted critical assets.
