

Critical Vulnerability Disclosures

Generated on 2026-07-31 15:28:04

Executive Summary

This report focuses exclusively on vulnerable assets. We identified 3 assets requiring immediate remediation due to legacy cryptography or impending certificate expiration.

PQC Readiness Score	20%
Risk Level	High

Vulnerable Assets

Asset Name	Algorithm	TLS Version	Status
HQ-GATEWAY-ISR	RSA	TLS 1.2	Medium
LEGACY-FTP-SRV	RSA	TLS 1.0	High
example.com	ECC	TLS 1.3, TLS 1.2	Medium

Master Asset Inventory

Total monitored assets: 3

Asset	Type	Risk	Algorithm	Subdomains
HQ-GATEWAY-ISR	Hardware	Medium	RSA	0
LEGACY-FTP-SRV	Software	High	RSA	0
example.com	Domain	Medium	ECC	1

Actionable Recommendations

- Upgrade outdated TLS to 1.3 across all perimeter gateways.
- Replace RSA signatures with PQC algorithms like Kyber.
- Renew certificates expiring within 30 days.
