

Enterprise Quantum Security Report

Generated on 2026-07-31 15:28:02

Executive Summary

System is practically 20% quantum-safe. 1 assets use legacy cryptography. Immediate upgrade recommended for High Risk nodes.

PQC Readiness Score	20%
Risk Level	High

Vulnerable Assets

Asset Name	Algorithm	TLS Version	Status
HQ-GATEWAY-ISR	RSA	TLS 1.2	Medium
LEGACY-FTP-SRV	RSA	TLS 1.0	High
example.com	ECC	TLS 1.3, TLS 1.2	Medium

Master Asset Inventory

Total monitored assets: 5

Asset	Type	Risk	Algorithm	Subdomains
PROD-DB-CORE-01	Software	Low	AES	0
HQ-GATEWAY-ISR	Hardware	Medium	RSA	0
LEGACY-FTP-SRV	Software	High	RSA	0
WKS-8821-M1	Hardware	Low	ECC	0
example.com	Domain	Medium	ECC	1

Actionable Recommendations

- Upgrade outdated TLS to 1.3 across all perimeter gateways.
- Replace RSA signatures with PQC algorithms like Kyber.
- Renew certificates expiring within 30 days.
